i miss you

i feel your thoughts deep inside of me
they touch the core of my soul
no distance is too great to see
but your dreams are so hard to hold

**i miss your touch, i miss your embrace
it's so lonely out here in space
i travel in search of humanity
hoping love will save their race... save their race**

when i left i gave a promise to you
to return when our star turns blue
across the void your love carries me
i will teach them what they need to be

chorus

their little world is so fragile now
they can't understand our connection
so much love is lost, they don't know how
to bring about their own resurrection

chorus

l.e.o. ain't high enough

push me up, speed of a bullet, come on take me higher
to the edge of the atmosphere, i can feel the starfire
i wanna swim in zero g, maybe jump on the moon
throw my spirit out to mars, you know i'll be there soon

**l.e.o. ain't high enough
got to get a boost, to the milky way
l.e.o. ain't high enough
shoot me out like a cosmic ray**

spin me round this old earth, let me get up speed
blast me through the asteroids towards ganymede
slingshot me around the sun to saturn's rings
let me pass the kuiper belt and hear the planets sing

chorus

light the candle, shoot me off this rock, put a smile on my face
kick it out of orbit, let's turn and burn, i got to have my space
got to have my space... got to have my space

chorus

shoot for the stars

points of light in the night, far across the milky way
alien eyes look at their skies, to see our ancient day
wonder if they shoot for the stars

**are we alone on this rock spinning round
lost in a universe, have we been found
will we hear what they have to say
can we go and meet them halfway
have we found the truth of the stars**

twinkling in the black, light looking back, man has meaning in the plan
galaxies spin no apparent end, life exists, universe expands
wonder if they shoot for the stars

**isolated on this water world
save the earth for every boy and girl
can we reach beyond human hate
realize we play with our fate
they will bring the truth of the stars**

we are here hope they are near, go before to a distant shore
search for signs explain the lines, to our past and all to explore
i think they shoot for the stars

unusual things

the moon is electric so am i, pieces of my past go flying by
i call for you through the galaxy, as our love spins into the sea

**unusual things, all in my mind
unusual things, moving space and time
unusual things, i can't explain
and you tell me i'm going insane**

in the stars i see my face, void of color a different race
this image of me sings a song, about a world of right and wrong

**unusual things, the television hides
unusual things, that never takes sides
unusual things, with no moral code
and you tell me to carry the load**

break

**unusual things, that melt away sin
unusual things, that were now and then
unusual things, bound up tight
and you tell me to walk in the light**

all my senses point the way, to a change in life, a better day
i'm alone, but i know you can see, billions of people sing to be free

angel of death

a raging zephyr is blowing... over sands of antiquity
war clouds are gathering... for a march to eternity
the evil rich are planning... destruction from secret places
to tear apart religions... and war among the races

**and i must do my work, what i was made for
to fill the earth with carnage and blood
this lord and master, the black gold of earth
must now serve the angel of death
for i am the angel of death**

centuries of mortal man... corpses consumed by fire
i've bathed in rivers of blood... and tasted their wicked desire
now again this fragile earth... will feel my judgement blade
in the name of their god... they run to death's parade

chorus

break

i know nothing of peace and good will,
none can stand next to the light
i was made to show the fruits of evil kill
and to send demons to an eternal night

chorus

come song

come to the show, come share what you know
come tell us things we can't comprehend
come down from the heights, come set our sights
come give us hope so we can begin

come to earth and join the fun
come on down, party round the sun
come to earth, bring your mystery
come on now, come make history

come teach compassion, come speak to nations
come turn us from greed and war
come heal our planet, come save us dammit
come show us what humanity is for

chorus

break

come give us a hand, come show us a plan
come tell us peace has a place
come strong, come fast, we may not last
come be a part to save the human race

chorus

fut the shuck up

they're saying this, they're saying that
not satisfied thin, or satisfied fat
always something wrong, can't find no relief
we find some happiness, they steal it like a thief

why don't they fut the shuck up... fut the shuck up
close those mouths and walk away... fut the shuck up
why don't they fut the shuck up... fut the shuck up
that's enough lies today... fut the shuck up

they're telling us to fear, that danger is near
evil's all around, gonna bite us on the rear
we're doomed if we don't, we're doomed if we do
trying to control us, they know it's true

chorus

don't let them tell us what we should believe
we weren't born dumb and blind
they haven't learned from the past,
they'll be the ones out of time

break

let's eat the aliens

friends, they are not, space brothers, i don't think so
they're little mutant cannibals and species carnivores
they say they come in peace, but they're really just shopping
livin' at area 51 making recipes for human dishes

**let's eat the aliens now and forever,
let's eat the aliens all together
let's eat the aliens, e.t. too,
let's eat the aliens, good for me and you**

help us, they will not, guide us to the stars, no way
the only way we'll go is inside what they call their stomach
we'd better eat them before they get to strong to resist
filet of alien could be the meal of the future

chorus

nutritious they surely are, full of mutilated cattle
they fly over ranches, dining on bovine heiney
let's bar-b-que them all, before they grow tired of beef
show the universe, we're eatin' sauteed extraterrestrial

chorus (2)

hmmm, pass me a plate of... alien... how 'bout some hot sauce
taste like chicken... hmmm, tasty... let's eat the aliens

i know stuff

i know stuff that will spin your head, i know stuff make you stay in bed
i know stuff you never been told, i know stuff that could be sold
i know stuff that's juicy and hot, i know stuff that could get me shot
i know stuff behind the scenes, i know stuff, the ways and means

**i know stuff i can't talk about
shouldn't whisper, sing or shout
you'd see the truth if i told you what to do
i know stuff but i can't tell you**

i know stuff i wish i never knew, i know stuff they use on you
i know stuff i shouldn't say, i know stuff turn night into day
i know stuff the news can't tell, i know stuff 'bout the gates of hell
i know stuff i should forget, i know stuff i wish i'd never met

chorus

break

i know stuff, outta this world, i know stuff, make your long hair curl
i know stuff about heaven and hell, i know stuff that i can't sell
i know stuff about outer space, i know stuff to melt your face
i know stuff that gives me chills, i know stuff to cure your ills

chorus

what's mine is yours

don't feel ashamed come drink your fill
i don't need to cure my ills
you can have bread on my table
feed yourself when you're able

**what's mine is yours, take what you need
better to give, not bound by greed
what's mine is yours i'll gladly share
you'll know there is one who cares**

i'm not like rulers who take
they always get a piece of my cake
millions go hungry while they grow fat
actions prove where hearts are at

chorus

someday soon their riches will rust
they'll be searching for some trust
you know i might give them a taste
a little kindness from the human race

chorus

low ridin' the galaxy

i'm a space pilot an astronaut, hero of the zero g parking lot
called to inspire all boys and girls, i ride on a rocket to other worlds
go round the sun, behind the moon, ain't coming back no time soon
dodgin' comets and asteroids, gotta lock it in, cruise the void

low ridin' the galaxy (low, low ride)
do i have time, so much to see
low ridin' the galaxy (low, low ride)
are others watching you and me
low ridin' the galaxy (low, low ride)
is there another earth out there
low ridin' the galaxy (low, low ride)
do they search, do they care

a star jockey has no fear, i face the unknown far and near
live for the thrill of discovery, to advance the cause of humanity
diggin' on the secrets of antiquity, to learn more 'bout you and me
dancin' with danger is my destiny, gotta explore, got to see

chorus

from mother earth, i'll go anywhere, mercury to pluto i don't care
test their atmosphere, find h₂o, map the surface and even below

chorus

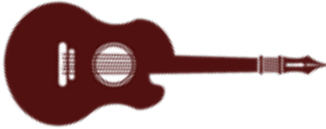

at's right baby, i'm low-ridin', i'm going places no man has gone before...
you wanna come along? go low-ridin' with me? see ya... i'm outta here.

meaner than evil

when strength and conquest is all they respect
to bring destruction to our universe
the talk of peace and love they will neglect
we must rise up and fight the curse

**we got to be meaner than evil
put aside our compassion and love
summon all our power and courage
see the eagle fight for the dove**

we got to be meaner than evil, more vicious, more deadly and cruel
they brought our wrath upon them now let righteousness be the fuel
let us look into their dead souless eyes, give thanks to our god for the victory
never let down our guard one moment until they're destroyed utterly

chorus

we got to be meaner than evil to bring our world salvation and peace
paved with the blood of invaders the road back to love kills the beast

break

meerkats of mars

a long way from earth exploring planet mars
sending back pics of a war from the stars
why is this here, ideas are misleading
could life be there watching and breathing

the meerkats of mars
they show us they don't fear it
the meerkats of mars
they've come to greet our spirit

we see rusted remains of technology
more than rocks, evidence we don't see
a hollywood basement might be their real home
whatever the source, we are not alone

chorus

break

is that volcanic rock or a melted computer
petrified body parts, a busted motor scooter
as long as robots roll, they will be our guides
showing us the sins of war has no winning sides

chorus

will of love

the light falls so softly upon your golden hair
you can speak to me about any of your cares
i can listen, i can learn, i can open new ways
anything to keep you laughing everyday

**why did you run from me, once you couldn't be away
now i think you want to be, someone who has a say
where will you go and hide, you know what i will do
our love is meant to be creepin up behind you
nothing's gonna stop the will of love
nothing's gonna stop the will of love**

so gently you give your love on this rainy afternoon
i know you'll want me again, i think it's very soon
have a glass of wine, pinot's were great that year
i see a reflection of love in one of your tears

chorus

break

chorus

the test

if angels come to you today
seeking righteous men of faith
you give the names, results are all the same
not good enough to save the human race
if angels tell you this evil has to end
god's hand is set to strike the earth
if you beg and plead for a godly man to lead
they might spare this planet's rebirth

**can we stand the test of the angels
will it end like sodom and gomorrah
if they came tonight, would our sin blind their sight
could we blame them for ending our sorrow**

if love of money could be changed, if jealousies were put away
would we still hate, would it be too late to join the hosts of heaven today

chorus

break

what is written has come to pass, judgment is coming for all men
they will come to test, they will seek the best to see if man can live as a friend

chorus
